

VENKATESH SETHUMURUGAN

DevOps Engineer | Platform Architecture & Leadership | AWS & Kubernetes | 3+ Years
+91 8608051219 | venkateshaws22@gmail.com | linkedin.com/in/venkatesh-sethumurugan | Theni, Tamil Nadu

PROFESSIONAL PROFILE

Results-driven DevOps Engineer and emerging technical leader with 3+ years designing, implementing, and operating production-grade cloud infrastructure. Passionate mentor committed to building high-performing engineering teams through hands-on guidance and knowledge sharing. Specialized in Kubernetes platform engineering, Infrastructure-as-Code (Terraform), and GitOps workflows. Delivered significant business impact: 32% AWS cost reduction (\$8k/month), 99.95% uptime SLAs across critical infrastructure, and 60% faster deployment cycles. Strong track record of mentoring engineers, improving team processes, and building technical foundations for organizational scaling. Committed to continuous learning and professional development.

KEY ACHIEVEMENTS

- **\$8,000/month AWS cost savings** — Delivered 32% cost reduction through Spot instance migration, Savings Plans optimization, and EC2 right-sizing across 4 AWS accounts
- **99.95% uptime SLA maintained** — Engineered production EKS and RDS clusters with automated failover, HPA-driven scaling, and Multi-AZ redundancy
- **65% infrastructure provisioning acceleration** — Built reusable Terraform modules reducing environment setup from 1 week to 1 day
- **Zero-downtime deployment capability** — Implemented blue-green + ArgoCD GitOps strategy eliminating production outages during releases
- **50% incident response improvement** — Deployed centralized observability stack enabling proactive detection and faster resolution
- **3-week engineering onboarding reduction** — Created 30+ comprehensive runbooks and documentation driving faster team ramp-up

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer | Easy Deploy, Coimbatore | Sep 2024 – Present

- Architected multi-account AWS Landing Zone (dev/stg/UAT/prod) using Terraform; reduced environment provisioning from 1 week to 1 day (65% faster) and eliminated manual configuration drift
- Designed and operated production EKS clusters (EC2 + Fargate) hosting 20+ microservices; implemented blue-green deployments achieving zero-downtime releases and cutting rollback time from 45 minutes to 5 minutes
- Built enterprise CI/CD pipelines (GitHub Actions, Jenkins, ArgoCD) with SonarCloud and Snyk security gates; reduced production defects by 40% and conducted security awareness training
- Automated ECS deployments (CodePipeline + CodeBuild); reduced manual deployment effort by 80% and documented deployment frameworks for team reference
- Engineered event-driven workflows (Lambda, EventBridge, SNS, S3); eliminated 15+ hours/week of manual operational tasks
- Managed RDS Aurora (PostgreSQL) and ElastiCache (Redis) with Multi-AZ failover; achieved 99.95% database uptime and developed comprehensive operational runbooks
- Deployed centralized observability (Prometheus, Grafana, Loki, ELK) with PagerDuty; reduced MTTR by 50% and mentored team on SRE monitoring practices
- Executed AWS cost optimization program; delivered \$8,000/month (32%) savings and documented cost management best practices

- Strengthened security (AWS WAF, KMS, Secrets Manager, OIDC, NACL); achieved zero critical findings in compliance audit and led security training
- Mentored 2 junior engineers on Infrastructure-as-Code, Kubernetes, and DevOps best practices; improved team's technical depth
- Authored 30+ runbooks, architecture diagrams, and guides; reduced new engineer onboarding time by 3 weeks

DevOps Engineer | Trioangle Technologies, Madurai | Dec 2023 – Jun 2024

- Built end-to-end CI/CD pipelines (GitHub Actions, GitLab CI, Jenkins) with integrated security testing; reduced release cycle from 2 weeks to 3 days (85% acceleration)
- Designed high-availability AWS infrastructure (EC2, RDS, S3, VPC, IAM) using Terraform and CloudFormation; achieved 99.9% uptime for 5+ applications
- Managed 40+ production/non-prod Linux/Unix servers (Ubuntu, CentOS); automated patching and routine tasks with Bash/Python, reducing manual ops effort by 60%
- Deployed Docker + Kubernetes microservices architecture; improved horizontal scalability and reduced deployment failures by 70%
- Implemented Grafana + Prometheus monitoring with custom dashboards; proactively resolved 95% of incidents before customer impact

Cloud Engineer | NextVee Enterprises, Coimbatore | Feb 2022 – Dec 2023

- Architected and deployed scalable AWS environments (EC2, RDS, S3, VPC) using Terraform for 8+ client projects; reduced infrastructure setup time by 50%
- Established CI/CD pipelines (GitHub Actions, GitLab CI) for multiple client projects; eliminated manual deployments and reduced production errors by 45%
- Monitored infrastructure proactively with Grafana and Prometheus; reduced incident response time from 2 hours to 20 minutes (83% improvement)
- Strengthened security through IAM least-privilege policies, VPC security groups, and encryption at rest/in-transit; maintained zero security breaches
- Led Agile process improvement initiatives using Jira and Confluence; improved sprint velocity by 25% and enhanced cross-team documentation

NOTABLE PROJECTS & INITIATIVES

Multi-Account AWS Landing Zone Architecture

Designed centralized, multi-account AWS organization (dev/stg/UAT/prod) with shared networking (Transit Gateway), centralized CloudTrail logging, and Service Control Policies. Built reusable Terraform modules reducing environment provisioning from days to hours. Documented architecture patterns and mentored team on best practices.

EKS Microservices Platform Development

Architected production EKS cluster hosting 20+ microservices with Helm chart management, ArgoCD GitOps, HPA auto-scaling, and blue-green deployments. Achieved zero-downtime releases and 99.95% availability. Conducted platform engineering training for development teams.

Centralized Observability & SRE Initiative

Deployed Prometheus + Grafana + Loki + ELK across all environments with unified dashboards and PagerDuty alerting. Reduced MTTR by 50%. Mentored team on SRE principles, incident response, and on-call best practices.

Cloud Cost Optimization & FinOps

Conducted comprehensive AWS cost audit across 4 accounts; implemented Savings Plans, Spot fleets, and intelligent scheduling. Delivered \$8,000/month savings. Documented cost optimization framework and trained team on cost monitoring practices.

TECHNICAL EXPERTISE

Cloud Platforms: AWS (EC2, EKS, ECS, Fargate, S3, RDS, Aurora, Lambda, CloudFront, Route 53, WAF, KMS, Secrets Manager, CodePipeline, EventBridge, SNS, SES, CloudWatch, IAM), GCP, DigitalOcean, Azure (fundamentals)

Infrastructure as Code: Terraform (advanced), AWS CloudFormation, reusable module development, IaC best practices

Containers & Orchestration: Docker, Kubernetes (EKS, self-managed), Helm, Fargate, ECS, HPA, Cluster Autoscaler

CI/CD & GitOps: GitHub Actions, Jenkins, GitLab CI, Bitbucket Pipelines, ArgoCD, AWS CodePipeline/CodeBuild/CodeDeploy

Observability & Monitoring: Prometheus, Grafana, Loki, ELK Stack, CloudWatch, PagerDuty, SRE practices

Security & Compliance: IAM (least-privilege), AWS WAF, KMS, Secrets Manager, OIDC, SSL/TLS, NACL, SonarCloud, Snyk

Scripting & Automation: Bash (advanced), Python (intermediate), infrastructure automation

Databases: Amazon RDS (MySQL, PostgreSQL), Aurora, ElastiCache (Redis), MongoDB

High Availability: Multi-AZ, Auto Scaling Groups, Load Balancing (ALB/NLB), Blue-Green Deployments, Canary Deployments

Collaboration & Leadership: Confluence, Jira, Git (GitHub, GitLab), Agile/Scrum, technical mentoring, team leadership

LEADERSHIP & PROFESSIONAL DEVELOPMENT

- **Mentoring:** Guided 2+ junior engineers on Kubernetes, GitOps, Infrastructure-as-Code, and DevOps best practices
- **Incident Leadership:** Led response for 10+ P1/P2 production incidents; reduced MTTR by 50% while building team's problem-solving skills
- **Process Improvement:** Spearheaded Agile initiatives improving sprint velocity by 25% and cross-team collaboration
- **Knowledge Management:** Created comprehensive documentation (30+ runbooks, architecture guides) reducing team onboarding by 3 weeks
- **Training & Development:** Conducted technical training on Kubernetes, CI/CD, Infrastructure-as-Code, and security best practices
- **Continuous Learning:** Actively pursuing BCA degree while developing expertise in cloud architecture, SRE principles, and team leadership

EDUCATION & CONTINUOUS LEARNING

- **Bachelor of Computer Applications (BCA)** — Kalasalingam University, Madurai | 2024–2027 (pursuing)
- **Diploma in Computer Science Engineering** — Government Polytechnic College, Madurai | 2017–2019
- **Professional Development Focus:** Kubernetes & container orchestration, AWS cloud architecture, SRE principles, infrastructure automation, technical leadership and mentoring
- **Learning Approach:** Hands-on projects, community engagement, continuous skill development, and knowledge sharing with peers
